TONU JAMES

MSc Human Centered Artificial Intelligence Graduate Seeking Career Transition

tonujk@gmail.com | +353 833704152| Stamp 1G | *linkedin.com/in/tonu-james* | *https://github.com/tonu1990*

PROFILE

- MSc graduate in Human-Centered AI, Technological University Dublin (January 2025), with hands-on experience in computer vision, predictive analytics, and machine learning projects.
- Experienced software developer (9 years) with strong programming skills and enterprise-level development experience, seeking transition into applied AI/data science.
- Passionate about impactful AI technologies (computer vision, explainable AI, generative AI) with a human-centered approach, and eagerness to explore emerging data science tools.

TECHNOLOGY SKILLS

- **Machine Learning**: scikit-learn, Keras, OpenCV, YOLO, Siamese Networks.
- **Data Science**: NumPy, Pandas, Matplotlib, Seaborn.
- **Programming**: Python, SQL, Object Oriented Programming (OOP), core Java, SAP ABAP

EDUCATION

M.Sc. in Human Centered Artificial Intelligence — *Technological University, Dublin*

September 2023 – January 2025. ***Second Class Honours***

- **Modules**: Statistics, Data Analysis and Programming, Artificial Intelligence and Machine Learning Modelling, Ethics & IT, Research Methods and Proposal Writing, Future of Artificial Intelligence and Learning, Society and AI: Risk and Compliance, Human Centric Deep Learning, Research Thesis.
- **Thesis Project** – Fairness in Pedestrian Detection: "A Comparative Study of Pedestrian Detection Bias between Indian and European Conditions Using YOLOX", *revealing significant disparities and the need for rigorous fairness testing in AI systems for autonomous driving*.
- **Academic Projects:**
  - Exploring Trade-offs Between Black-Box and Glass-Box Models in Face Similarity: Siamese Networks vs. KNN (poster published in ACM)
  - A Comparative Study of Pedestrian Footfall Trends using Time Series forecasting using Holt-Winters, SARIMA and Prophet

Master of Technology in Computer Science with Image Processing — *CUSAT University, India*

2012– 2014 *First Class – CGPA 8.3*

WORK EXPERIENCE

Technological University Dublin | Software Development Lab Assistant (*Part Time*) *March 2024-May 2024*

- Overseeing the practical exercises in the Lab for Second-year Bachelor's students of Strength 50.
- Lab exercises encompass application level programs within Object Oriented Programming using Python, focusing on key concepts like inheritance, encapsulation, methods and attributes.

SAP Labs, *India***|** Software Developer *December 2015- August 2023*

- Development of AI-based proof-of-concept projects, utilizing few-shot learning, YOLO, and Autoencoders to address real-world challenges such as retail shelf management and document processing.
- Led a team of 4 involved in support of 100+ customers using SAP payment solution SAP Multi-Bank Connectivity (MBC) Connector.

- Client RBC (Royal Bank of Canada), SBSA (Standard Bank of South Africa): Development and support of SAP CRM based projects for mortgage application and KYC application. Primarily focused on SAP ABAP, CRM Web UI, BRF+.
- Client TetraPak: Support of SAP PLM cFolder based application for design creation workflow of TetraPak packaging solution. Developed an ABAP-based transformation tool using OData to migrate transactional and master data from SAP to a non-SAP system.

Tata Consultancy Services, *India* | Associate Developer *December 2014 - November 2015*

- Client Credit Suisse Investments Bank: Involved in creating interactive live reports, combining large sets of live streaming data, for Risk Calculation in Banking using Java.
